Student Documentation	Model Documentation
<p><b>Subjective</b></p> <p><a href="#">Danny Rivera</a> is an 8 year old male patient who reports to have had a cough for the last 4 to 5 days. He reports the cough is worse at night and makes him not sleep well and also gets fatigued. He describes the cough as watery. He also has a running nose. He has mild soreness in his throat which he relieves with over the counter drugs. He had <a href="#">ear infections</a> when young and had pneumonia in the past. He denies any headache, dizziness, fever, sputum, chest pain , abdominal pain or breathing problems. His cough does not get worse when he is active.</p>	<p>Return to Canvas to complete your <a href="#">SOAP note for this assignment</a>. Pediatric Cough Shadow Health for Danny Rivera</p>

**Objective**

HEET: Mucus membranes are moist, with a clear nasal discharge. Redness, cobblestoning at the back of the throat. Eyes are dull with pink conjunctiva. Right tympanic membrane is inflamed . It is also red. The right cervical lymph node is tender and enlarged. Cardiovascular: S1, S2. There is neither murmurs, gallops nor rubs. Respiratory: Respiratory rate is increased but no distress. Breath sounds are clear to auscultation and negative bronchophony. The chest wall is resonant to percussion. Spirom... Pediatric Cough Shadow Health for Danny Rivera

- You must proofread your paper. But do not strictly rely on your computer's spell-checker and grammar-checker; failure to do so indicates a lack of effort on your part and you can expect your grade to suffer accordingly. Papers with numerous misspelled words and grammatical mistakes will be penalized.
- Read over your paper – in silence and then aloud – before handing it in and make corrections as necessary. Often it is advantageous to have a friend proofread your paper for obvious errors. Handwritten corrections are preferable to uncorrected mistakes.
- Use a standard 10 to 12 point (10 to 12 characters per inch) typeface. Smaller or compressed types and papers with small margins or single-spacing are hard to

read. It is better to let your essay run over the recommended number of pages than to try to compress it into fewer pages.

- Likewise, large type, large margins, large indentations, triple-spacing, increased leading (space between lines), increased kerning (space between letters), and any other such attempts at “padding” to increase the length of a paper are unacceptable, wasteful of trees, and will not fool your professor. Pediatric Cough Shadow Health for Danny Rivera
- The paper must be neatly formatted, double-spaced with a one-inch margin on the top, bottom, and sides of each page. When submitting a hard copy, be sure to use white paper and print out using dark ink. If it is hard to read your essay, it will also be hard to follow your argument.

SBAR

Proficiency Level: **Proficient**

**Digital Clinical Experience Score – Pediatric Cough Shadow Health For Danny Rivera**

96.9%

- Beginning
- Developing
- Proficient

Students rated as “proficient” demonstrate entry-level expertise in nursing competencies and clinical reasoning skills. In comparable nursing programs, the top 25% of students perform at the level of a proficient nurse.

This score measures your performance on the Student Performance Index in relation to other students in comparable academic programs. Your instructor has chosen to scale your Student Performance Index score so that the average score on the index is 80.0%. This score may not be your final grade if your instructor chooses to include additional components, such as
